

Dear FCC:

I am writing you to encourage you to reject NAB's petition 04-160. I urge you to allow satellite radio to grow or die in a fair, competitive environment. This is America, and competition is what should drive the market. I bought a satellite radio because I grew frustrated with the lack of variety and excess commercials on conventional radio. I greatly appreciate finally having an alternative -even though I need to pay for this choice (much like those who chose to pay for cable television). Please don't take this choice away, and let excellence drive the market.

Sincerely,

Beyonda Likins
